## Introduction

---

This document is the property of the Michigan Department of Community Health (MDCH). The information contained in this document is for the use of Trading Partners engaging in electronic data interchange (EDI) health care transactions with the State of Michigan's Community Health Automated Medicaid Payment System (CHAMPS).

This document is intended as a companion to the 005010X217 • 278 Health Care Services Review – Request for Review and Response Technical Report 3 (TR3) dated May 2006. This document also includes updates appearing in:

- Errata 005010X217E1 • 278 Health Care Services Review – Request for Review and Response dated April 2008
- Errata 005010X217E2 • 278 Health Care Services Review – Request for Review and Response dated January 2009

The TR3 documents replace the 4010A1 Implementation Guide and related Addenda. The 5010A1 TR3 and related Errata documents can be downloaded from the Washington Publishing Company web site at <http://www.wpc-edi.com/content/view/817/1>.

This document is expected to be used in conjunction with the TR3 and related Errata for the 278 transaction set. The content of this document follows the guidelines authorized in the version modifications to the Health Insurance Portability and Accountability Act (HIPAA) Final Rule transaction standards published in the Federal Register January 16, 2009.

This document provides MDCH-specific instructions regarding certain elements within the TR3 but does not change, supersede, or add to the definitions, data conditions, or use of data elements or segments in the standard. This document provides MDCH rules regarding:

- Identifiers to use when a national standard has not been adopted
- Parameters in the TR3 and related Errata that provide options

In order to successfully download HIPAA transactions from the CHAMPS system it is necessary to comply with the information contained in the MDCH Electronic Submission Manual Dated February 2009. Note that revision of the MDCH Electronic Submission Manual is expected during calendar year 2011. The most current version of this manual can be downloaded from the MDCH web site at the following location: [http://www.michigan.gov/mdch/0,1607,7-132-2945\\_42542\\_42545\\_42638---,00.html](http://www.michigan.gov/mdch/0,1607,7-132-2945_42542_42545_42638---,00.html).

## Transaction Description

---

As noted in the TR3, the 278 transaction set supports the following business events:

- Admission certification review request and associated response
- Referral review request and associated response
- Health care services certification review request and associated response
- Extend certification review request and associated response
- Certification appeal review request and associated response
- Reservation of medical services request and associated response
- Cancellations of service reservations request and associated response

## Upload/Submission Notes for ANSI ASC X12 278 Health Care Services Review – Request for Review

---

The 278 Health Care Services Request and Response transactions do not replace the verbal request process. If there is an urgent/emergent situation, telephone authorization must still be obtained.

MDCH accommodates the 278 Health Care Services transactions for the processing of prior authorizations. As noted in the X12N 278 (005010X217) Implementation Guide, the Michigan Department of Community Health (MDCH) will support one patient event (prior authorization request or preadmission certification request) per 278 transaction (ST through SE.)

MDCH has made special arrangements to assist Michigan Peer Review Organization (MPRO) for the interchange of preadmission certification and select Special Services 278 Health Care Services Request and Response transactions. 278 Health Care Service Requests for preadmission certification and select Special Services received by MDCH will be forwarded to MPRO for processing. MPRO will return the corresponding preadmission certification 278 Health Care Service Responses to MDCH for forwarding back to the requesting entity. Please see Appendix A - Submission of Supporting Documentation for information regarding how to contact MDCH and MPRO.

When using the 278 Health Care Services Request transaction, the following Michigan Department of Community Health (MDCH) forms do not need to be submitted:

- Special Services Prior Approval-Request Authorization (MSA-1653-B)
- Occupational/Physical Therapy-Speech Pathology Prior Approval-Request/Authorization (MSA-115)
- Dental Prior Approval Authorization Request (MSA-16780-B)

The 278 Health Care Services Request and Response transactions supply the same information noted on these forms. Any forms not noted must still be mailed and/or faxed.

Submission of supporting documentation for the 278 batch will continue to be the same as DDE. The 278 Health Care Services Request and Response transactions do not support the ability to submit all supporting documentation electronically. To process a 278 Health Care Services Request properly, the requester will still be required to mail or fax (when applicable) the necessary supporting documentation. If you have questions, please contact MDCH at 1-800-622-0276 or for MPRO 800-727-7223.

To correlate an electronically submitted prior authorization request properly with mailed or faxed supporting documentation, MDCH requires the use of a trace number located in the TRN segment of Loop 2000C. This trace number must be a unique number for each individual prior authorization or preadmission certification request. The trace number submitted on the electronic request must be noted on all mailed or faxed supporting documentation. Failure to place the trace number in the 278 Request and on all mailed or faxed documentation may result in the rejection or denial of the prior authorization or preadmission certification request.

MDCH will return a 999 Acknowledgement when a 278 Request for Review transaction is accepted for processing or when syntactical errors are encountered. When errors are encountered within the interchange, a TA1 transaction will be produced and no Functional Groups within the Interchange will be processed.

When a 278 Health Care Service Request for prior authorization is accepted for processing, MDCH will generate a 278 Health Care Service Response within fifteen (15) business days.

MPRO will generate a 278 Health Care Service Response for an accepted 278 Health Care Service Request for preadmission certification within one (1) business day.

When the 278 Request for Review transaction has missing or invalid data, the electronic request for prior authorization or preadmission certification will be rejected resulting in a 278 Health Care Service Response transaction with applicable AAA segment(s). The AAA segments provide explanation of the error(s) found and, in most instances; will require correction and resubmission of the request.

MDCH may return a 278 Response transaction requesting additional information. The request for additional information will specify where the additional information should be mailed or faxed. If MDCH does not receive the requested information within thirty business days, another 278 Response transaction will be returned denying the electronically submitted prior authorization request.

MPRO will request all additional information via the telephone. If MPRO does not receive the requested additional information within three (3) business days, a 278 Response transaction will be returned denying the preadmission certification request.

Please refer to the MDCH Electronic Submission Manual for information regarding:

- Interaction with the MDCH's Data Exchange Gateway (DEG)
- Modes of submission (FTP versus Web submission)
- Interchange Acknowledgement (TA1) transaction
- Interchange Acknowledgement (999) transaction

This document uses several text conventions to distinguish MDCH data elements from the TR3 data elements. The following table lists the text conventions used in this document.

Convention used	Explanation
< >	Text included within < > describes what will be transmitted by MDCH. This could be the MDCH data element name or value, or, if blank, will display <spaces>.
" "	Text with " " around a value represents HIPAA TR3 values.
( )	The HIPAA TR3 description of the value in quotes, described above, is provided parenthetically.
